

Berichte (8)

Filesize: 4.91 MB

Reviews

Most of these ebook is the perfect publication offered. Sure, it really is play, still an interesting and amazing literature. You wont truly feel monotony at whenever you want of your time (that's what catalogs are for about in the event you check with me).

(Roosevelt Rohan)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. Original publisher: Reston, Va. : U. S. Geological Survey, 2006. OCLC Number: (OCoLC)84723686 Subject: Fishes -- Effect of water pollution on -- Imperial Valley (Calif. and Mexico). Excerpt: . . . Sperm Cell Viability and Mitochondrial Function Cell suspensions were filtered with 30 m nylon mesh (Small Parts, Miami Lakes, Fla.) prior to dilution to 1 x 10⁶ mL. Suspensions of cells at 250 l aliquots were stained by using a live dead sperm viability kit (Molecular Probes, Eugene, Oreg.) with a starting stock solution of 1: 100 SYBR-14 (Segovia and others, 2000). For mitochondrial membrane potential, dual fluorescent staining with Rhodamine 123 (R123) (Sigma-Aldrich Chemical Company Co. , St. Louis, Mo.) and PI was used according to Segovia and others (2000). The analytical instrumentation used to obtain data was a flow cytometer (FACScan, BDIS). For the verification of cell condition and probes employed, epifluorescence microscopy (Leitz Diaplan) was used in conjunction with flow cytometry. Sperm Maturity Stored cell suspensions were stained with PI, RNase A at 1 g mL, and 0. 1 (v v) Triton X-100 for 30 min at 24 C. Stained cells were filtered through a 30 m nylon mesh, and distributions of nuclei in different meiotic stages were analyzed with a flow 6 cytometer (FACScan BDIS). Nuclei were analyzed at 1 x 10⁶ per mL at a rate of 300 per second, and 5-10 K events were collected by using a 1024-channel FL2 parameter at 340 linear, with linear size and scatter parameters, and doublet discrimination mode. Samples were run in triplicate. Histograms, dot plots, and density plots were generated by using...
