RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 80 pages. Original publisher: Washington, D. C. : National Aeronautics and Space Administration, Office of Management, Scientific and Technical Information Division, 1991. OCLC Number: ocm27903759 Subject: Aerodynamics. Excerpt: . . . With two series, the numerical result can be matched for P and P . The coefficients an, bn and C depend on the Machnumberprofile in the boundary layer and can be found by substitution into Equation 18. Whenthe series in Equations 21 and 22 are matched to the numerical result on the fuselage side of the singular point (z Zs), a decision must be maden--by regarding branches of the log function. This issue has been discussed kextesta sively in the literature in conjunction with studies of boundary layer inor bility using the 2D incompressible version of Equation 18. The early w Tollmien, Lin 7, Wasoaw is summarizedby Schlichting 3 where it is shown that the branch of the logarithm must be taken such that ln (z-zs) in z-Zs-iw for z zs. This was proved by examina-ow tion of a more complete fourth order differential equation for the fl that, because it includes viscosity,...
