Reviews

*A really wonderful book with lucid and perfect reasons. This can be for all who statte there was not a worth reading through. You are going to like how the author write this book.
(Dr. Grady Jacobi DDS)*

SAAT AUF HOFFNUNG ROMAN

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 64 pages. Original publisher: Adelphi, MD: Army Research Laboratory, 2007 OCLC Number: (OCoLC)466382899 Subject: Direct energy conversion -- United States. Excerpt: . . . Although the Sr90 beta spectrum was the basis for the calculations performed, its spectrum is similar to many other isotopes beta spectrum that may be used for future experimentation. Nickel-63 is known to vary from Sr90 s spectrum, where instead of peaking at approximately one third of the endpoint energy, the peak of Ni63 s output spectrum occurs at the extreme low end of the spectrum (10). It has been shown that the low energy electrons (100 keV) deposit more of their energy into the materials than the high energy (100 keV) electrons. The lower energy electrons are more likely to be captured by the depletion region of DEC s and converted into usable power in a circuit (11). This studys purpose is to give an approximation of what to expect in future experimentation. MCNPX is a nuclear scattering code showing conversion of electron and photon incident energy into scattered electrons and photons. In parallel, a drift-diffusion circuit model is in the process of being verified. This parametric study calculates the efficiency of energy absorbed by the DEC material, as a function of isotope input-energy-spectrum and material. The output of MCNPX includes tallies and mesh calculations of particle flux, energy deposition and dose; along with mesh calculations of similar metrics. The tallies are dumped into an output text file along with a set of default data and tables. The mesh data is dumped into a separate mesh file, and needs to be converted into text format through another program, called gridconv, which comes with the MCNPX package....
