Brand New Book ***** Print on Demand *****.Excerpt from **Elementary Physics and Chemistry: Third Stage** This book is the last of three little volumes containing a course of elementary Physics and Chemistry based upon a syllabus of work approved several years ago by the Board of Education as suitable for the upper standards of elementary schools. The object of the instruction prescribed is not so much to convey information as to develop a scientific habit of thinking in the pupils, and it is in sympathy with this spirit that the books have been prepared. Wherever the study of science is being commenced, it should be through the consideration of the properties of familiar things; for this is the best way to encourage an intelligent interest in scientific reasons and results. The course of work here followed is thus as suitable for the lower forms of secondary schools as for schools of other grades. A knowledge of the scientific meaning of such facts of ordinary experience as are described and examined in this and the two companion volumes should, indeed, be possessed by everyone. The value of practical exercises in all scientific instruction, however elementary, is now so widely recognised that it is almost unnecessary to advise that the experiments described in each lesson should be actually performed. Unfortunately, it is not often possible to provide accommodation and apparatus sufficient to enable individual pupils to experiment.
