The teeth to be fastened should be bound or ligated to the splint. Fig. 5. Fig. 5 shows a case in which the appliance used was very similar to those before described, but this anchorage was attached to the teeth in the same arch in which was located the malposed tooth. The appliance in detail is as follows: The first bicuspid was banded and a pipe soldered to the labial surface of the band, in which was hooked the piece of the gold wire, the other end being bent so as to rest on the cutting-edge of the lateral incisor. A pin was soldered to this wire, as in the case before described, and a delicate ligature was then stretched from pin to pin, thus...
