Brand New Book ***** Print on Demand *****.Excerpt from The Geology of the Fannich Mountains and the Country Around Upper Loch Maree and Strath Broom: Explanation of Sheet 92 This Memoir describes the geology of the area included in Sheet 02 of the one-inch map of Scotland. It comprises the mountainous ground bounding the upper part of Loch Maree and extending northwards to Gruinard Bay and the head of Loch Broom, the Fannich mountains in the south-east quadrant, and that part of the main watershed of the Highlands situated to the east of Strath Broom. This elevated region forms part of the county of Eoss, but formerly it contained small outlying portions of the county of Cromarty. The belt of complication due to the post-Cambrian movements crosses the sheet from Loch Broom to the alluvial plain at the head of Loch Maree. To the west of this belt lie large tracts of Lewisian Gneiss and Torridon Sandstone overlain unconformably by the Cambrian formation. To the east there is a great development of the Eastern Schists, which give rise to some of the wildest scenery...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
